

# SHIBIN T

## Full Stack Developer — React Native Developer

Kerala, India — +91 9526353831 — [shibinshoukath0@gmail.com](mailto:shibinshoukath0@gmail.com)

[LinkedIn](#) — [GitHub](#) — [Portfolio](#) — **Open to Relocate**

### PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of professional experience building scalable web, enterprise, and mobile applications. Strong experience with React.js, React Native, Node.js, TypeScript, RESTful APIs, PostgreSQL, and MongoDB, with additional knowledge of .NET and C#. Currently developing cross-platform mobile applications using React Native, including reusable components, API integration, authentication, state management, and responsive mobile interfaces. Experienced in enterprise ERP development, role-based access control, real-time applications, AI-powered workflows, and performance optimization. Skilled in translating business requirements into maintainable, responsive, and production-ready applications while collaborating effectively in Agile teams.

### CORE COMPETENCIES

#### Full Stack Development

React.js / Frontend Development

RESTful API Development

Enterprise ERP Applications

Authentication & Authorization

Database Integration

Business Workflow Development

Responsive UI Development

Performance Optimization

#### React Native Development

Node.js / Backend Development

.NET / C# Development

Mobile Application Development

Role-Based Access Control

Real-Time Application Development

API Integration

Cross-Platform Development

Agile / Scrum Development

### TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, C#, SQL, HTML, CSS, Python (Basic)
- **Frontend:** React.js, Next.js, Angular, Redux, React Query, Tailwind CSS, Bootstrap, Material UI
- **Mobile:** React Native, Expo, Cross-Platform Development, Mobile UI Development, REST API Integration
- **Backend:** Node.js, Express.js, .NET, ASP.NET, C#, REST APIs, Socket.IO, JWT, API Integration
- **Databases:** PostgreSQL, MongoDB, SQL Server, Redis, Prisma, Sequelize
- **Cloud & DevOps:** AWS, Docker, CI/CD, Vercel, Render, Netlify
- **Tools & Testing:** Git, GitHub, VS Code, npm, Yarn, Expo CLI, Figma, Postman, Chrome DevTools, API Testing, Debugging
- **Development Practices:** REST Architecture, MVC, RBAC, Authentication, Responsive Design, Software Architecture, Agile/Scrum

### WORK EXPERIENCE

#### Associate Software Product Developer, Larklabs

05/2025 – Present

Calicut, India

- Develop and maintain scalable enterprise ERP applications using React.js and TypeScript across multiple business domains.
- Currently develop cross-platform mobile applications using React Native, building reusable components, integrating RESTful APIs, managing application state, and implementing responsive mobile interfaces.
- Develop Inventory Analytics, Finance, and Project Management modules with advanced filtering, PDF exports, and role-based access control.
- Build reusable frontend components and integrate RESTful APIs to improve application consistency, maintainability, and development efficiency.
- Implement AI-powered workflow automation and real-time communication using Socket.IO.
- Integrate backend services with web and mobile applications while implementing authentication, data handling, and application state management.
- Collaborate with backend developers, QA engineers, and product managers throughout Agile development cycles.
- Improve application performance through lazy loading, component optimization, refactoring, and efficient state management.

#### Junior Software Developer, Rearway Technologies

04/2025 – 05/2025

Manjeri, India

- Developed reusable React.js components and integrated RESTful APIs for business applications with focus on maintainability and usability.
- Contributed to feature development, API integration, testing, debugging, and code reviews within Agile development workflows.
- Collaborated with senior developers to deliver scalable frontend functionality following modern development practices.

Software Developer, Strokkx  
Kochi, India

02/2025 – 04/2025

- Developed responsive client-facing web applications by translating business requirements into scalable frontend solutions.
- Built reusable interfaces and integrated frontend components with backend services and RESTful APIs.
- Collaborated with designers, backend developers, and stakeholders to deliver applications aligned with business requirements.

Software Developer, Techmaghi  
Kochi, India

08/2024 – 02/2025

- Developed a responsive Event Management web application supporting event creation, booking, and management workflows.
- Designed responsive and interactive user interfaces for desktop and mobile devices.
- Integrated RESTful APIs for dynamic data management, authentication, and real-time application functionality.

EDUCATION

B.Tech – Computer Science & Engineering  
APJ Abdul Kalam Technological University

2020 – 2024  
Kerala, India

PROJECTS

Service Center Management App – Freelance Project  
Prisma

React Native — Node.js — TypeScript — PostgreSQL —

- Developed a cross-platform service center management application using React Native and Node.js to manage customer service operations, staff workflows, and service requests.
- Implemented role-based access control with dedicated permissions and workflows for Admin, Manager, and Staff users.
- Developed enquiry and issue management features allowing staff to create, update, track, and respond to customer service requests.
- Implemented staff management functionality allowing authorized users to add and manage staff according to assigned roles.
- Integrated RESTful APIs for authentication, users, customers, devices, jobs, payments, notifications, and reporting.
- Developed backend services using Node.js, TypeScript, PostgreSQL, and Prisma with JWT authentication and request validation.
- Implemented real-time functionality using Socket.IO and integrated secure communication between mobile and backend services.
- Designed reusable mobile components and role-specific navigation to provide focused workflows for different user types.
- [GitHub Repository](#) — [Expo Build](#)

Food Delivery Website

React.js — Node.js — Express.js — MongoDB

- Developed a full-stack food delivery application supporting menu browsing, order placement, real-time order tracking, and user authentication.
- Built RESTful APIs using Node.js and Express.js with MongoDB for order, menu, and user data management.
- Implemented secure authentication, input validation, error handling, and responsive interfaces for desktop and mobile devices.
- Applied reusable component architecture and efficient state management to improve maintainability and application performance.
- [GitHub Repository](#)

Doctors Appointment

Node.js — Express.js — Firebase

- Developed a secure appointment management system supporting scheduling, booking management, and patient-doctor interactions.
- Implemented authentication and Role-Based Access Control (RBAC) for patients, doctors, and administrators.
- Integrated Firebase Authentication and Cloud Firestore for secure user management and real-time data synchronization.
- Applied input validation, error handling, and scalable application architecture to improve reliability and maintainability.
- [GitHub Repository](#)

Fizzi

Next.js — Three.js — GSAP — Prismic CMS

- Developed an immersive 3D WebGL web experience featuring interactive product animations and responsive user interactions.
- Integrated Prismic CMS for dynamic content management and reusable content-driven application components.
- Optimized rendering performance through lazy loading, asset optimization, and efficient component architecture.
- [GitHub Repository](#)

LANGUAGES

English – Fluent — Malayalam – Native — Hindi – Fluent — Tamil – Fluent — Arabic – Basic
